Technical Information

Efka® FL 3277

(old : Efka® 3277)

slip and leveling agent general

improves leveling

prevents cratering

helps substrate wetting

acts as a defoamer and de-aeration aid

does not interfere with intercoat adhesion

chemical nature fluorocarbon-modified polymer

Properties

physical form slightly hazy, lightly colored liquid

shelf life The product should be stored in a cool dry place. When kept in its

original unopened containers, it will keep up to 4 years.

typical properties (no supply specification) active ingredients ~ 98% refractive index ~ 1.470 flash point 85 °C (185°F)

≤ 2

color

Application

Efka® FL 3277 is particularly suited for:

baking enamels based on alkyd, acrylic or polyester resins

polyurethane coatings

two-pack epoxy compounds

air-drying alkyd systems

recommended concentrations

0.5-2.0% on total formulation

Efka® FL 3277 should be added at the end of the batch preparation.

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose. Any descriptions, drawings, photographs, data, proportions, weights, etc. given herein may change without prior information and do not constitute the agreed contractual quality of the product.
