

# Efka<sup>®</sup> PU 4055

(old : Efka<sup>®</sup> 4055)

The Chemical Company

## general

high-molecular-weight dispersing agent

Efka<sup>®</sup> PU 4055 is a polymeric dispersant for stabilizing inorganic and organic pigments. This results in:

- improved gloss
- reduced flooding problems
- higher color strength
- lower viscosity

## chemical nature

modified polyurethane

## Properties

### physical form

clear, yellowish liquid

### shelf life

Efka<sup>®</sup> PU 4055 should be stored in a cool and dry place. When kept in original unopened containers, it can be stored for up to 4 years from the date of manufacture.

### typical properties (no supply specification)

solvent	n-butyl acetate/methoxypropyl acetate/alkylbenzene
density at 20 °C (68 °F)	~ 0.99 g/cm <sup>3</sup>
active ingredients	~ 40 %
flash point	24 °C (75°F)
amine value	~ 13 mg KOH/g
color	≤ 7

## Application

Efka<sup>®</sup> PU 4055 is used for all kinds of solvent-based coatings as well as pigment concentrates.

### recommended concentrations

Calculation method for the required amount of active ingredient on pigment:

inorganic pigments	10 % of oil absorption value
organic pigments	25–50 % of BET value
carbon blacks	20 % of DBP absorption value

Efka<sup>®</sup> PU 4055 should be incorporated in the mill base before adding the pigments.

**Safety**

When handling this product please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

**Note**

The data contained in this publication are based on our current knowledge and experience.
