## Efka® PX 4751

general	high-molecular-weight dispersing agent		
		g agent that is suitable for solvent-base tings. EFKA® PX 4751 is based on	
		efficiency in stabilizing pigments an tibility with many solvent-based resi	
	high pigment loading at low mill base viscosity		
	<ul> <li>high efficiency with and without a pigment synergist</li> <li>especially suitable for optimum dispersion of α Cu-phthalocyanin pigments</li> </ul>		
chemical nature	Polymer with pigment-affine gro	oups	
Properties			
physical form	clear yellowish liquid		
shelf life	EFKA® PX 4751 should be stored in a dry and cool place. When kep in original unopened containers, it can be stored for up to 4 years fron the date of manufacture.		
typical properties	solvent	1-methoxy-2-propyl acetate	
(no supply specification)	density at 20 °C (68 °F)	~ 1.03 g/cm <sup>3</sup>	
	active ingredients	~ 51 %	
		~ 12 mg KOH/g	
	amine value	12 mg Ron/g	

EFKA® PX 4751 is highly suitable to be used in Resin-Minimal Pigment Concentrates (RMPC) for a wide range of solvent-based industrial and automotive coatings.

automotive coatings
OEM: acrylic/melamine
OEM: polyester/melamine
refinish: 2-pack PUR

EFKA® PX 4751 delivers optimum performance on  $\alpha$  Cuphthalocyanine pigments. For  $\beta$  Cu-phthalocyanine pigments it is recommended to also test CGPS 242-30.

guideline formulations for resin-minimal pigment concentrates (RMPC)

Heliogen<sup>®</sup> Blue L6950

Colour Index (Pigment)	PB 15:1
EFKA® PX 4751	6.0
Methoxy propyl acetate	67.30
Laropal A81, 60% in MPA	16.70
Pigment	10.00
	100.00

The addition levels are recommended for starting formulations. For optimum results a ladder study should be performed in the customer specific binder formulation

**recommended concentrations** Calculation method to estimate the minimum required amount of active ingredients on pigment (solid dispersant on ...):

inorganic pigments	10–15 % on oil absorption value
organic pigments (green, blue, violet)	15–30 % on BET value
organic pigments (yellow, orange, red)	15–45 % on BET value
carbon blacks (LCF)	15–20 % on DBP value
carbon blacks (HCC)	40–50 % on DBP value

EFKA® PX 4751 should be incorporated in the mill base before adding the pigments.

Safety

When handling this product please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

Note

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose. Any descriptions, drawings, photographs, data, proportions, weights, etc. given herein may change without prior information and do not constitute the agreed contractual quality of the product. The agreed contractual quality of the product results exclusively from the statements made in the product specification.
