## Technical Data Sheet

# Joncryl® 646

|                                    |  |
|------------------------------------|--|
| <b>Product Description</b>         | Joncryl® 646 is a high molecular weight, acrylic colloidal emulsion for corrugated ink applications. |
| <b>Key Features &amp; Benefits</b> | - Cost-effective letdown vehicle<br>- Effective thickening agent                                     |
| <b>Chemical Composition</b>        | Styrene acrylic colloidal emulsion   |

### Properties

|                           |  |                        |
|---------------------------|--|------------------------|
| <b>Typical Properties</b> | Appearance   | opaque emulsion        |
|                           | Non-volatile at 145°C (2g, 30 min)                       | ~ 40.5%                |
|                           | pH at 25°C   | ~ 6.5                  |
|                           | Acid number (2g sample)                                  | ~ 138                  |
|                           | Molecular weight (Mw)                                    | 100,000                |
|                           | Viscosity at 25°C<br>(Brookfield #4 LVF spindle, 12 rpm) | 45 cps                 |
|                           | Density at 25°C  | 1.07 g/cm <sup>3</sup> |
|                           | MFFT   | < 7°C                  |
|                           | Tg   | 30°C                   |
|                           | Freeze-thaw stable                                       | No                     |
|                           | Total VOC  | < 0.005% wt            |

These typical values should not be interpreted as specifications.

### Applications

Joncryl® 646 is a high molecular weight, colloidal emulsion designed to minimize the cost of inks for corrugated board. The balance between the molecular weight and the composition of this emulsion results in the ability to maintain viscosity of corrugated inks with a minimal amount of polymer.

Joncryl® 646 performs as a very efficient letdown vehicle by allowing the formulator to maximize the percentage of water in the ink, while maintaining viscosity and printing properties.

Joncryl® 646 is recommended for applications such as:

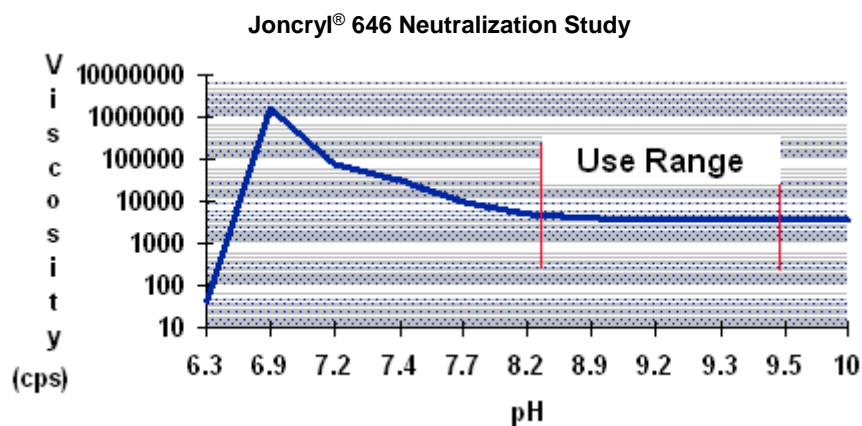

- Printing inks for flexographic or gravure applications

### Processing

Since Joncryl® 646 is supplied in the acidic form, it must be neutralized with ammonium hydroxide or organic amines and diluted before subsequent use in ink formulations.

Because of its high viscosity profile, the formulation of varnishes at 10% polymer solids is highly recommended.

The following graph represents the variation in viscosity of Joncryl® 646 as a function of pH. Note that in the recommended pH range of 8.2 – 9.5, the viscosity is very stable.

## Safety

### General

The usual safety precautions when handling chemicals must be observed. These include the measures described in Federal, State, and Local health and safety regulations, thorough ventilation of the workplace, good skin care, and wearing of protective goggles.

### Safety Data Sheet

All safety information is provided in the Safety Data Sheet for Joncryl® 646.

## Important

While the descriptions, designs, data and information contained herein are presented in good faith and believed to be accurate, they are provided for guidance only. Because many factors may affect processing or application/use, BASF recommends that the reader make tests to determine the suitability of a product for a particular purpose prior to use. **NO WARRANTIES OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE MADE REGARDING PRODUCTS DESCRIBED OR DESIGNS, DATA OR INFORMATION SET FORTH, OR THAT THE PRODUCTS, DESCRIPTIONS, DESIGNS, DATA OR INFORMATION MAY BE USED WITHOUT INFRINGING THE INTELLECTUAL PROPERTY RIGHTS OF OTHERS.** In no case shall the descriptions, information, data or designs provided be considered a part of BASF's terms and conditions of sale. Further, the descriptions, designs, data, and information furnished by BASF hereunder are given gratis and BASF assumes no obligation or liability for the descriptions, designs, data or information given or results obtained all such being given and accepted at the reader's risk.
