

# Complete Anhydrite

## Technical Data Sheet

Date: March 2018

### Azelis Construction Solutions

#### Product Description

Complete Anhydrite is a synthetic Calcium Sulphate Anhydrite which, when blended with Portland cement and a CSA (calcium sulphotoaluminate) or CA (calcium aluminate) binder; produces a cement with high early strength, low shrinkage and improved sulphate resistance. Use Complete Anhydrite to reduce your carbon footprint and lower your environmental impact.

#### Handling and Storage

When stored in original, unopened packaging under dry conditions, shelf life of Complete Anhydrite is up to 1 year. Do not expose to moisture or other harmful environmental conditions.

#### Properties and Application

The properties of cements based on Complete Anhydrite depend on the sources and proportions of CSA or CA, and portland cement. For cementitious products such as grouts, concretes, mortars, screeds, plasters and renders.

#### Packaging

Complete Anhydrite is available in 70 lb bags and in bulk (PD railcar or truck tanker)

The data presented in this Technical Data Sheet are in accordance with the present state of our knowledge.

The information contained in this document is made without guarantee and warranty, express or implied, regarding the suitability for use, merchantability, or performance of any formulation and its ingredients in any application.

It is the sole responsibility of the user of this information to determine validity, applicability, and performance of the information, formulations, and claims prior to commercialization, use, and application thereof.

The recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and if necessary clarifying the position.
