

Complete CSA

Technical Data Sheet

Date: March 2018

Azelis Construction Solutions

Product Description

Complete CSA is a calcium sulfoaluminate mineral additive which, when blended with Portland cement and a suitable source of sulphate, produces a cement with high early strength, low shrinkage and improved sulphate resistance. Complete CSA can be used to reduce carbon footprints and lower environmental impacts. Production of Complete CSA cement results in decreased CO2 emissions.

Handling and Storage

Complete CSA should be stored in its original packaging in a cool, dry place. Do not expose to moisture or other harmful environmental conditions. When stored appropriately, shelf life is up to 1 year. Complete CSA calcium sulfoaluminate cement offers extended shelf life beyond CAC calcium aluminate cements.

Properties

The properties of cements based on Complete CSA depend on the sources and proportions of sulphate and portland cement. Typical sources of sulphate are milled natural or synthetic calcium sulphate anhydrite.

Application

For cementitious products such as grouts, mortars, screeds, plasters and renders.

Packaging

Complete CSA is available in 70 lb bags and bulk.
